WORK EXPERIENCE

Front-end Developer(Intern)

GYRONEB

05/2023 - 11/2023,

Thiruttangal, Sivakasi

Project

- E-Learning Platform

MERN stack developer

Spiegel Technologies

11/2023 - Present,

Ellis nagar, Madurai

Project

- Exchange App (Backend)
- Purepay Wallet(Backend)
- Horeb MLM(Frontend)

EDUCATION

MCA

Mepco Schlenk Engineering College

10/2021 - 05/2023,

Sivakasi, TN

CGPA

- 7.8

B.Sc(Computer Science)

N.M.S.S.Vellaichamy Nadar College

06/2018 - 04/2021,

Nagamalai, Madurai

CGPA

- 7.8

PERSONAL PROJECTS

CarePulse

A patient management app where users can book appointments and admins can schedule or cancel them. This project helped me learn new technologies like Appwrite and Shadcn.

My Portfolio

A portfolio website showcasing my identity, skills, and experience with an improved UI. It allowed me to learn new technologies, such as creating a proper component approach using Next.js and enhancing user experience with Framer Motion.

SKILLS

React JS

Node

HTML

CSS

Javascript

MongoDB

Tailwind

Next JS

Docker

Rest API

AWS

PROJECTS

E-Learning Platform

- We have been building an online learning platform for those who wants to pursue their career in software industry. We have been building an online learning platform for those who wants to pursue their career in software industry.

Exchange App

- It is one of the demo product of the company in which we can deposit, and process transaction using cryptos and I have done API creation for some functionalities like user authentication, trade using cryptos, maintain user transactions, 2FA for security.

Purepay Wallet App

- It is one of the Crypto Wallet App and I contributed in backend using node and Mysql and I created API including features like Import new tokens, Send and receive tokens to and from other wallets, Create, buy, and sell peer-to-peer orders with ease
- Implemented (2FA) and biometric authentication to ensure enhanced security, Enabled automatic transaction updates for activities conducted through external applications.

Horeb MLM

- It is one of the MLM Project and I contributed in frontend development using React including features like user authentication with mail verification, KYC for user document verification
- Profile updation for user, Manual Placement of user who referred from someone in Genealogy tree, Provided some Commissions for Direct Referral, Level Commissions for user upgrade to every level, Maintance of Earning history includes individual earnings from his downline users and leaderboard for showing user position
